Control multiple zones or structures from anywhere with the Oelo Evolution app

(Even while you're away on vacation!)

Multiple buildings, color-changing, from anywhere!

With our Oelo Evolution app, customize your lighting, save your favorite patterns, schedule your patterns daily, weekly or yearly and control your lights, zones and multiple structures from anywhere in the world. Our cloud-based system can be controlled from any iPhone or Android device through WiFi, cellular or Ethernet connection.

Six individually addressable outputs!

Oelo's state-of-the-art controller touts **six individually addressable outputs**, which allows you to control more than half a dozen zones separately from one controller for creative, hybrid installs and out-and-down lighting effects!

Invisible by day ... seamless by design.

Seamless channel

Oelo's patented system blends in seamlessly with any structure, available in acrylic or metal cover options. If you're looking for a flush look, our acrylic system hides the LEDs behind a lens, while our metal option features minimal mounting components, perfect for DIY installs or residential structures with limited fascia.

IMPACT-RESISTANT ACRYLIC

Oelo's acrylic cover features an impact-resistant, fade-resistant flush design. Because our LEDs are IP68 waterproof rated, the cover's main function is to mount the lights in a permanent, aesthetic way.

- ✓ **LED appearance:** Spaced 10" or closer behind translucent lens for a flush look
- ✓ **Length:** 8' increments that can be cut to size, allowing the system to be customizable
- ✓ **Colors:** Available in a variety of standard colors.

DURABLE METAL CHANNEL

Our Colorado-made metal LED cover offers quick installation. With minimal mounting components and a variety of bends to achieve different looks, this channel is a favorite for DIY installs.

- ✓ **LED appearance:** Snaps into channel for quick install and even spacing
- ✓ **Length:** 7' 6" increments that can be cut to size, allowing the system to be customizable
- ✓ **Colors:** Available in a variety of standard colors (or optional custom powder-coat color match)

Versatile lighting for years to come.

Our IP68 water-proof rated LED lights deliver Oelo's infinite lighting capabilities. Plus, each 36V system is rated for 100,000 hours of use, the equivalent of 34 years of nightly 8-hour glow. Meanwhile, Oelo's patented cover system is designed to withstand the elements while providing the industry's most versatile mounting options.

ADOBE-STYLE HOME?

Check out our C Slim channel. If your home has exposed rafters, this bend can be mounted to the bottom fascia board for downward lighting. (This type of fascia is typically found on adobe-style homes.)

YOU CHOOSE:
OUR TRADITIONAL GLOW OR OELO'S WALL-WASH LOOK.
OR BOTH!

FACE MOUNT

Oelo can be hung on the fascia, pointing outward for a traditional Christmas light glow. The system's LEDs are visible from every angle using this effect. And while this is considered our most traditional look, Oelo's app lets you create "gaps" in the lighting by allowing you to control each individual LED for a modern lighting effect.

UNDER MOUNT

Oelo is one of the few permanent lighting systems that can be hung BOTH on the fascia AND under the eaves. The under-mount effect creates a wall-wash glow, illuminating the exterior with color to eliminate shadows and highlight the wall. This effect is compliant with the Dark Sky Initiative because the LEDs are angled downward.
