

## RESIDENTIAL LIGHTING COVER OPTIONS

Invisible by day ... seamless by design.

### IMPACT-RESISTANT ACRYLIC

Oelo's acrylic cover features an impact-resistant, fade-resistant flush design. Because our LEDs are IP68 waterproof rated, the cover's main function is to mount the lights in a permanent, aesthetic way.

- ✓ **LED appearance:** Spaced 10" or closer behind translucent lens for a flush look
- ✓ **Length:** 8' increments that can be cut to size, allowing the system to be customizable
- ✓ **Colors:** Available in a variety of standard colors, this channel is also paintable!

### DURABLE METAL CHANNEL

Our Colorado-made metal LED cover offers quick installation. With minimal mounting components and a variety of bends to achieve different looks, this channel is a favorite for DIY installs.

- ✓ **LED appearance:** Snaps into channel for quick install and even spacing
- ✓ **Length:** 7' 6" increments that can be cut to size, allowing the system to be customizable
- ✓ **Colors:** Powder coated in a variety of standard color options (or inquire about color-match)

# oelo

**YOU CHOOSE:**  
OUR TRADITIONAL  
GLOW OR OELO'S  
WALL-WASH LOOK.  
**OR BOTH!**

## FACE MOUNT

Oelo can be hung on the fascia, pointing outward for a traditional Christmas light glow. The system's LEDs are visible from every angle using this effect. And while this is considered our most traditional look, Oelo's app lets you create "gaps" in the lighting by allowing you to control each individual LED for a modern lighting effect.

## UNDER MOUNT

Oelo is one of the few permanent lighting systems that can be hung BOTH on the fascia AND under the eaves. The under-mount effect creates a wall-wash glow, illuminating the exterior with color to eliminate shadows and highlight the wall. This effect is compliant with the Dark Sky Initiative because the LEDs are angled downward.

### NORMAL ROOF LINE (WITH OR WITHOUT GUTTERS)

### ROOF LINE WITH SOFFIT CEILINGS

Soffit Ceilings less than 1.4" deep

### CONTINUOUS FASCIA BOARD (ADOBE HOMES)

## ADOBE HOME?

Check out our C Slim channel. If your home has exposed rafters, this bend can be mounted to the bottom fascia board for downward lighting. (This type of fascia is typically found on adobe homes.)
