

OELO RETROFIT KIT / EVOLUTION APP UPGRADE

The next evolution has arrived!

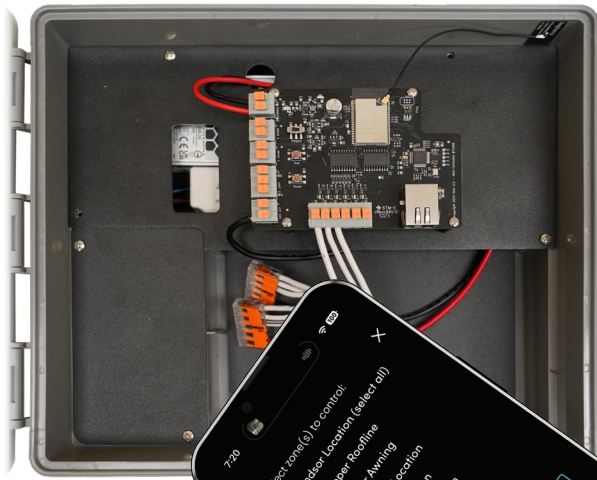

At Oelo, we want our existing customers to have access to the latest and greatest technology, so we are offering a New Controller Retrofit Kit, featuring our new LED controller, plus automatic upgrade to Oelo's new Evolution App. With the turn of a few screws and the swap of a handful of wires, this retrofit replaces the current board to provide Oelo's newest control features to existing 36V systems.

Why upgrade? See reverse side. | What does the kit include? These components >

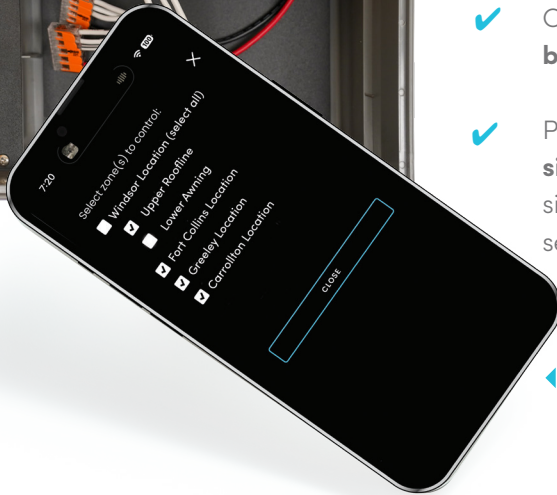

Make the upgrade!!

GET OELO'S NEW ADVANCED CONTROLLER

Easy install!

- ✓ Oelo's new controller has the ability to power up to **300 lights** from a single control box (or more with an optional boost box)!
- ✓ Oelo's controller also features a premium antenna for **better connectivity!**
- ✓ Plus, the controller has **six (6) individually controllable signal outputs**, which allows you or your dealer to install six different zones from one controller for creative installs, like separate out-and-down sections and front and rear zones!

Individual zones!
